Task 9: Contributions

Allyson (u23525984):
Task 3:
- Completed mapping with Morgan.

Task 5 - Backend:
- Products endpoint (only used by Administrators or retailers):
    - Add products
    - Delete products
    - Update products
- Products manager endpoint (available to all users):
    - Get products(with filters and sort or by id)
    - Get categories for products
    - Get comparisons
- Watchlist endpoint:
    - Add to watchlist
    - Remove from watchlist
    - Get watchlist

Task 5 - Documentation & explanation of web-based application implementation and approach:
- Completed with morgan.

Task 7:
- Completed all of task 7.

Morgan (u23541068):
Task 5 - Backend:
- The api singleton class outline
- Users endpoint
    - Including the addition / removal / updating of users to the database
- Retailers endpoint
    - Including the addition / removal or retailers
- Login endpoint
    - Including the user signup (*where a user essentially adds themselves to the database*) and login in functionality

Task 5 - Documentation & explanation of web-based application implementation and approach:
- Completed with Allyson.

Task 3:
- Completed mapping with Allyson.

Task 4:
- Completed task 4 with Gerard.

Gerard (u24568385):

- Setup GitHub repository.
- Completed (E)ER-Diagram with Megan.
- Created the relational schema.
- Populated the database.
- Implemented the administrator dashboard.
- Implemented the retailer dashboard.
- Implemented the product comparison client-side logic.

Megan (u24575764):

- Completed (E)ER-Diagram with Gerard.
- Implemented the login client-side logic.
- Implemented the signup client-side logic.
- Implemented the customer dashboard client-side logic.
- Implemented the watchlist functionality.
- Implemented the product view page and reviews api-endpoint with client-side logic.

Jonty (u23536862):
